General qualifications to DONATE BLOOD

Anyone 17 or older may be eligible to donate blood. Individuals who are 16 years old may be eligible to donate with parental consent.

- You must bring a valid picture ID prior to donation.
- Donors age 19 and up must weigh at least 110 pounds.
- Donors age 16 to 18 must weigh 122 pounds.
- *16-year-old donors must have parental consent.
- Potential donors must be in general good health, without any cold or flu symptoms.

WHAT TO EXPECT

Plasma donations are made through an automated process. Automated donations allow you to selectively give a single blood component, with the remaining blood returned to you.
What is CONVALESCENT PLASMA?

Because you fought the infection, your plasma now contains COVID-19 antibodies.

These antibodies provided one way for your immune system to fight the virus when you were sick, so your plasma may be able to help others fight off the disease.

QUALIFICATIONS for donating

Must have had a positive COVID-19 diagnosis documented or a positive antibody test.

Must have fully recovered from COVID-19, with no symptoms for at least 28 days before the donation or recovered with no symptoms for 14 days and a second test with negative results.

Must meet all existing donor eligibility requirements.

Be a hero, help others

You can donate convalescent plasma and help save lives.
